Good class, the exercise session were incredibly helpful.

Le cours est parfaitement structuré avec les 3 séances d'exercices pendant le semestre.

Personally, I found it very interesting and captivating to follow the course. Highly appreciate the use of actual data to show some concepts from the theory. The course is well structured and exercise sessions are helpful in deepening the knowledge of the concepts covered in class.

I appreciate a lot the teacher, he explains well and the course is very interesting. I also like to work on the bonus, and I appreciate that it is not compulsory (it's even more motivating that way). The exercises are well done, not too long, not too difficult, and they help to understand the course (I noted a real improvement compared to the exercices of the course macro II).
